

## **Rheumatology Patient Education Tool E-mail and Privacy Policy**

When you register to use this rheumatology patient education iPad Application, you are given the option of requesting to receive messages (via email, text or SMS) with information we think you might find useful (i.e., image updates and product information). Should you choose to receive these messages via text or SMS, please note that standard charges will apply. If you decide, at any time, that you no longer wish to receive these messages, you may change the relevant "Application Settings" to "OFF." To stop any and all messages from Amgen, you may unsubscribe from our email list by completing the form located at <https://preferences.amgen.com>.

You will also have the option to email images directly to patients. Please remember that it is your responsibility to obtain proper patient authorization for such email correspondence, and to use a secure email server or system. Neither Amgen nor Pfizer will have access to, or record of, the content or email addresses you enter into this system. A pre-populated disclosure statement addressed to patients is included below the image. Do not alter or delete the disclosure statement.
